Horwich, UK *GCSE*

- GCSE: Achieved 6-4 including English Language (5) and Mathematics (5)

Work Experience

Royal Mail **October 2025 – Present**
Warrington, UK *Mail Sorter (Full-Time since August 2026)*

- Expertly operated **Parcel Sorting Machines (PSM)** and managed end-to-end workflows across **Inward, Outward, Dispatch, and Ejects**, processing over **30,000 parcels per shift**.
- Consistently exceeded performance targets by maintaining a processing rate of **50+ Yorks/hour**, demonstrating high efficiency, reliability, and the ability to thrive in high-pressure, target-driven environments.

Mortgage Market **Mar 2023 – Aug 2023**
Remote *1st Line Helpdesk*

- Resolved 150 technical support tickets with 25-minute average resolution time using **Zoho Desk**.
- Developed documentation, **reducing recurring tickets by 87%** and improving operational efficiency.

Projects

RadarThing | Live: Link

- Re-engineered a GeoFS flight radar display using **TypeScript** and **Next.js**, with a **Convex** real-time backend and **Clerk** authentication.
- Built a PRO subscription tier with **Stripe** billing and webhooks, gating advanced weather, NOTAM and global airport chart data.
- Integrated **Leaflet** for map rendering; added flight recording and replay, conflict alerts, flight plans, and a "Heading Mode" calculator.

vstrips - GeoFS Virtual Strips | Live: Link

- Engineered a real-time, full-stack ATC system for virtual flight simulation using **Next.js 15** and **TypeScript**.
- Developed a dynamic ATC board and pilot flight filing form backed by **Convex** for live data sync, with **Clerk** authentication.

DriveThing - Family File Storage | Live: Link

- Built a shared family file store using **Next.js 15**, **Convex** for real-time sync, **Clerk** authentication and **UploadThing** storage.
- Implemented owner/member roles with per-file sharing, folder uploads, in-app previews, bulk actions and installable **PWA** support.

Jban - Kanban To-Do Board | Live: Link

- Developed a drag-and-drop kanban board with **Next.js 15**, **dnd-kit** and **shadcn/ui**, plus a calendar view for rescheduling tasks.
- Used **Convex** queries, mutations and nightly cron jobs with **Clerk** Google OAuth passed to Convex as a JWT.
